## Indoor Monitor's network configuration :

(1) Overview:

The third-party cloud service used in this product is "Tuya Smart", which supports two network configuration modes, WIFI fast connection mode and WIFI AP mode.

(2) Steps of configuration network:

First, download the "Tuya Smart" APP in the application market and register your account.

Step 1: click the corresponding configuration network mode on the machine, setting--network setting--configuration network mode (note: switching the configuration network mode needs to be restarted);

Step 2: After selecting the configuration network mode, then to select the corresponding distribution network mode on the APP and enter the configuration network;

WIFI AP mode device select "AP mode", WIFI fast connection mode device selection "ZE mode"

Configuration network of WIFI fast connection:

- 1) Mobile phone is first connected to the WIFI network (2.4G);
- 2) Select "ZE mode" on the machine (the default);
- 3) Click "Tuya Smart" APP, add equipment- - security sensing- - smart camera- - select "WI\_FI mode" in the upper right corner -- enter the user name and password of the current WIFI network- - start the network configuration- configuration done- -complete.

Specific operation progress of WIFI AP mode:(WIFI AP mode configuration network is recommended)

Click Tuya Smart APP

# Specific operation process of WIFI AP mode EZ mode (WIFI AP mode configuration network is recommended)

Click Tuya Smart APP

Add Device

Select Camera & lock, double click Smart Camera(WiFi)

Selection WiFi mode to configure network

Choose AP mode or EZ mode Choose the mode of configuration network based on the indoor monitor settings

Both AP and EZ mode can set the WIFI account and password here

Choose the hotspot for AP mode to connect the device

Account: SmartLife\*\*\*\*\*

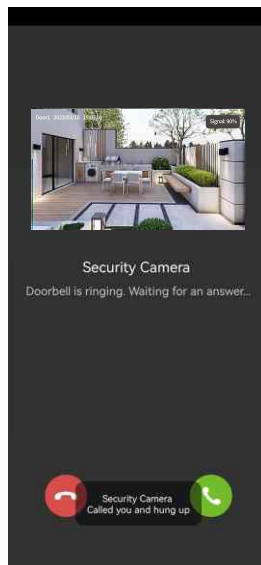

Password: 12345678

Back to Tuya app to do network configuration after hotspot connected  
In EZ mode type home's WIFI account and password, then enter this page

Add device successfully

Call Operation

## Product Technical Parameters

Bus power supply:	DC24V
External auxiliary power supply:	DC12V
Operation current:	24V--500mA
Standy current:	24V--150mA
Operation temperature:	-20 °Cto+55°C
