Getting Started

Thank you for choosing our Video Intercom System! We are proud to introduce the new updated 2-wire system, providing a straightforward installation, and a simple, intuitive user experience.

This manual includes installation steps, programming instructions, and wiring diagrams.

Please read all instructions in this manual carefully, and check all components before installing them in the building. We recommend installing and testing one component at a time (ie. room stations) making it easier to detect a potential error before completion.

Attached at the end of this installation section is a detachable End-User manual.

Feel free to detach the page, make copies, and distribute to your tenants for their reference.

Parts and functions

Adjust the timer setting with Bit-4 and Bit-5 at the outdoor station (00 = Off/Off):

DIP switches

Bit state	Setting	Bit state	Setting
	Monitor at the end of the line		Reserved
	Monitor NOT at the end of the line		Reserved
